ABOUT

Junior software developer with hands-on full-stack experience in React, TypeScript, Node.js, Python and NestJS. Currently specialising in AI engineering, building and testing an AI-powered assistant. Alongside my own project work, I coach trainee developers through code reviews and one-on-one explanations, and I'm comfortable working in Agile teams and communicating clearly with both technical and non-technical people.

EXPERIENCE

Software Development Coach

Mar 2026 - Present

The Gym — Core Skills Training Program

- Mentor junior developers on JavaScript fundamentals, the DOM, ES6, CSS, Git and algorithmic problem-solving
- Support project-based learning through code reviews and one-on-one technical explanations
- Guide learners through debugging and error resolution

Trainee, Phase 2 — AI Engineering

Mar 2026 - Present

The Gym x MaibornWolff — Software Development

- Specialising in AI engineering: building and testing an AI-powered assistant with FastAPI
- Focused on clean code, backend application development and technical documentation
- Testing integrations and troubleshooting issues across the assistant's components

Trainee, Phase 1

Nov 2024 - Feb 2026

The Gym — Rwanda's most intense software development trainee program

- Built full-stack applications and worked issues through structured peer code reviews
- Documented solutions and explained technical concepts to teammates
- Collaborated in Agile sprints, communicating progress and blockers
- Configured development environments (Docker, PostgreSQL)
- Tested API integrations and identified bugs before deployment

VOLUNTEER WORK

Software Development Trainer

Apr 2025 - Sep 2025

Code in the Gap Year — Preparatory Training

- Delivered sessions on JavaScript, CSS and React for junior learners
- Guided debugging and explained error resolution
- Facilitated team collaboration activities

EDUCATION

Bachelor of Software Engineering

Sep 2024 - Present

AUCA — Adventist University of Central Africa

Math - Physics - Computer Science

Jan 2020 - Aug 2023

Byimana School of Sciences

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Node.js, NestJS, FastAPI, Java, C

Databases: PostgreSQL, PL/SQL

Tools & Practices: Git, Docker, Agile/Scrum

Also Comfortable With: Debugging & troubleshooting, technical documentation, mentoring

LANGUAGES

Spoken: Kinyarwanda (Native), English (Fluent), French (Intermediate)
